Version 3.00

· **Released as following function update in April 2018**
1. Supports Guitar Lab version3.
2. Improved the display of the tuner.
3. Improved the encoder operation.
4. Added OutputVP that takes over the volume setting when switching patches.
5. Added effects already distributed online.

Version 2.00

· **Released as following function update and bug fix in February 2017**

■Function Update
1. Amplifier modeling processing has been optimized to avoid "Process Overflow".
2. Added the settings for TAP LED flashing.
3. Added 2 Unit Looper.
4. Improved the encoder operation.

■Bug Fixes
1. Shortened the time necessary to connect to Guitarlab software.
2. Overview screen displays a white square when it enters the PC MODE during patch name change.
3. Very slight noise sometimes appears on the rhythm track when looper and rhythm are used at the same time.
4. Recording of the looper sometimes fails when looper and rhythm are used at the same time.

Version 1.00

· **Released as mass production in December 2015**
